

GREG DEHETRE, R.W. STUDIOS

# Jewelry Care

R.W. Studios uses Sterling Silver for it's creations.

Sterling Silver can be cleaned with commercial Silver cleaner (liquid works better than paste for chains), or a cleaning cloth.

Use this recipe as an alternative to commercial cleaner:

- baking dish
- 1/4 cup baking soda
- 1 tbsp salt
- 2 cups boiling water
- aluminum foil (crumpled up, then smoothed out again)
- Put the foil at the bottom of the baking dish, then add ingredients.
- Make sure silver jewelry touches the foil to transfer tarnish.
- The foil should turn darker at this point, if not, turn the foil over.

\*Sterling Silver jewelry should be kept in ziplock bags when not being worn.
