

GREG DEHETRE, R.W. STUDIOS

Jewelry Care

R.W. Studios uses mostly sterling silver for it's creations.

Sterling Silver can be cleaned with commercial Silver cleaner (liquid works better than paste for chains), or a cleaning cloth.

Use this recipe as an alternative to commercial cleaner:

- baking dish
- 1/4 cup baking soda
- 1 tbsp salt
- 2 cups boiling water
- aluminum foil (crumpled up, then smoothed out again)
- Put the foil at the bottom of the baking dish, then add ingredients.
- Make sure silver jewelry touches the foil to transfer tarnish.
- The foil should turn darker at this point, if not, turn the foil over.

*Sterling Silver jewelry should be kept in ziplock bags when not being worn.
